FACT SHEET

THE SOUTH BUILDING IN DETAIL

Function: The Campus's main new building, dedicated to research activities, technology platforms and scientific collaboration:

- research laboratories
- technology platforms and shared scientific facilities
- genomics
- structural biology
- advanced microscopy
- data management and analysis
- automation platforms
- spaces for training and scientific collaboration
- offices and support spaces

Courtesy Piuarch

Dimensions

- **more than 12,500 m²** of laboratory space
- **12 floors above ground**
- **1 basement level**
- **66 metres** maximum height
- approximately **1,000–1,200 workstations** planned overall*

** The total number of workstations may vary depending on the final configuration of the spaces.*

Key features

- highly flexible spaces that can be adapted as scientific needs evolve
- highly technologically specialised environments and infrastructure
- integration with the Campus's other buildings and existing infrastructure
- creation of a **Technology Hub** housing the ICT infrastructure required to expand scientific computing, artificial intelligence and data storage capacity.

Sustainability

- targeting **LEED Gold certification**
- solutions to reduce energy and water consumption
- solar power generation
- green roofs and terraces
